Putri Febrihandini Harmonia

+62-831-5586-9728 | putrifebrihandini@gmail.com | Bandung, West Java

SUMMARY

Industrial Engineering graduate with hands-on experience in software development, laboratory operations, and process analysis, complemented by team leadership and financial management responsibilities. Experienced in developing applications using Python and Google AppSheet, supporting practical learning activities, and identifying opportunities to improve operational workflows and documentation. Also brings experience in budget planning, financial reporting, and cross-functional coordination through organizational roles. Combines analytical problem-solving with a structured approach to data, documentation, and daily operations, with an interest in applying these skills to industrial engineering, information systems, and business process improvement.

EDUCATION

Bandung Islamic University - Bandung, West Java **September 2022 - August 2026**
Bachelor of Industrial Engineering (GPA: 3.61/4.00)

WORK EXPERIENCE

Head Engineer - Laboratory Assistant **March 2026 - Present**
Laboratory Of Information Systems And Decisions, Bandung Islamic University

- Lead and coordinate a team of laboratory assistants to manage daily operations, allocate resources, and maintain equipment readiness for academic and technical activities.
- Coordinate practical sessions for Computer Programming and Information Systems Analysis & Design, helping students apply programming concepts and system analysis methods through hands-on exercises.
- Organize Arduino and Internet of Things (IoT) training sessions for 20+ students, providing practical exposure to hardware integration, programming, and emerging technologies.
- Oversee laboratory facilities, operational readiness, and team coordination to support an organized learning environment and the smooth delivery of technical activities.

Junior Software Engineer - Laboratory Assistant **March 2025 - February 2026**
Laboratory Of Information Systems And Decisions, Bandung Islamic University

- Collaborated with a team of 6 laboratory assistants to coordinate laboratory activities, support technical operations, and maintain the delivery of practical learning sessions.
- Co-developed 8 practical learning modules for Computer Programming and Information Systems Analysis & Design, supporting hands-on learning for 100+ students.
- Developed applications using Python and Google AppSheet to support laboratory operations and information systems learning activities, translating practical needs into application features.
- Tested and debugged application features and prepared technical documentation to identify issues, improve functionality, and support ongoing application maintenance.

Program Management Intern - Maintenance, Assembly, and Modification Division (MS) **July 2025 - August 2025**
Indonesian Aerospace (IAe)

- Reviewed aircraft maintenance, assembly, and modification workflows to understand operational procedures, documentation requirements, and coordination across related functions.
- Analyzed manual maintenance documentation practices to identify potential issues affecting work-hour recording, information accuracy, and operational efficiency.
- Examined maintenance worksheet procedures and documented how work-hour records and operational data were recorded and managed within existing workflows.
- Documented findings and identified opportunities for process improvement and digitalization to support more accurate recordkeeping and efficient maintenance documentation.

ORGANIZATION EXPERIENCE

General Treasurer **October 2025 - September 2026**
Keluarga Mahasiswa Teknik Industri (KMTI) Unisba

- Managed financial planning and budget allocation for an organization with 40+ executive board members, coordinated revenue and expenditure budgets with program treasurers, and prepared periodic financial reports to support transparent financial management and informed budget decisions.

Division Treasurer - Education and Religious Development Division **September 2024 - June 2025**
Bakti Desa Unisba

- Managed budget allocation for 4 work programs, maintained monthly records of income and expenditures, and prepared financial accountability reports to support accurate documentation and ensure spending remained within approved budgets.

CORE COMPETENCIES

Technicall Skills : Microsoft Office (Word, Excel, Visio, Access) | Python Programming | MySQL & Database Management | Software Development & Debugging | Google AppSheet | Business Intelligence & Data Visualization (Google Data Studio) | ERP Systems (Odoo) | IoT & Arduino IDE | Technical Documentation | Workflow Analysis

Proffesionals Skills : Team Coordination | Project and Operational Support | Analytical Thinking | Process Improvement | Data Accuracy and Record Management | Technical Communication | Cross-Functional Collaboration | Problem-Solving | Financial Reporting | Budget Monitoring
